

NIKOLA TESLA

“The man who invented the future”

**A unique museum, full of INVENTIONS, associated to
SCIENCE and INNOVATION.**

***March 1st - April 21st
International State Fair, Pavilion 28***

NIKOLA TESLA

"The Man Who invented
the Future"

The work and personality of this
unique person is attempted to
present the exhibition organized by
EKSAGON EXHIBITIONS, emphasizing
on the elements of vision and his
genius.

This exhibition is based on European
and high educational standards,
with intense educational and
interactive character.

After the Shanghai Science and Technology Museum of China, the educational exhibition -museum "Nikola Tesla, the man from Future", visits our island.

If inventions such as electricity, wireless technology, radar, X-rays and radio have technologically developed the 20th century, then "inventor of the 20th century" is Nikola Tesla.

A remarkable personality for both its technological and scientific work but also the human values he used to advocate.

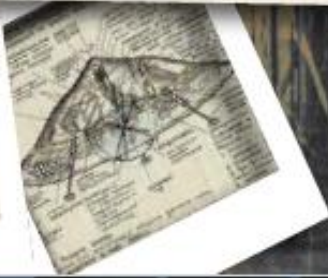

He invented the alternating current and fought for his dissemination without aiming for financial gain. He did not care about praise, resulting to dying alone and poor, allowing all its heritage of discoveries to be used today more than ever.

Through the tour, the visitors will have the opportunity to enjoy the work of the great inventor. There are a total of 14 exhibits on scale which most of them interactive, and models of Tesla inventions.

At the same time, a 2m height coil produces a voltage of two million volts at regular intervals, offering a unique spectacle.

The exhibition evolves in three directions to cover the full range of the life and contribution of the scientist that marked the 20th century:

- Tesla's life through a chronology.
- The achievements and work of Tesla, which are divided in four sections: alternating current, inductive motor - high voltage and frequency, coils, wireless energy transfer, engineering.
- The vision and the beliefs of Nikola Tesla.

With great respect we invite the education community for a unique tour to the "future" for an unforgettable experience!

Visitors:

- 1st Primary School - 4th Primary School: a Theatrical Performance called "Tesla Kids" takes place, (approximately 50') with actors from Greece.
- 4th - 6th Primary, Secondary education: the 50-minute tour is performed by qualified personnel specially trained for the specific exhibition.

Reservations:

Necessary to book by phone 22008567
(Monday to Friday, 8.30-13.30)
